

Ideation Phase

Empathize & Discover

Date	20 October 2023
Team ID	592923
Project Name	Garment Worker Productivity Prediction
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

The project focuses on creating a machine learning model to predict garment worker productivity by utilizing a dataset with production-related attributes, offering potential improvements for various industries.
